

EDUCATION

India	Rajiv Gandhi Proudlyogiki Vishwavidyalaya	2022 - 2026
• Specialization: B. Tech in Computer Science Engineering		
Indore, India	Golden International School	2017 - 2022
• Education: Higher and Higher Secondary Education		

SKILLS

Programming Languages: C, C++, Python, JavaScript, SQL

Frameworks & Libraries: Pandas, Pillow, Flask, FastAPI, Streamlit, Gradio

AI & Automation: Google Gemini API, Hugging Face Transformers

Web Technologies: HTML, CSS

Tools & Platforms: Git, GitHub, Linux, Google Workspace

IoT & Embedded Systems: ESP8266, NodeMCU, ThingSpeak

Courses: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks

PROJECTS

[TruthInBite AI Based Food Label Analyzer](#)

(Python, Streamlit, Google Gemini API, Pandas, Pillow)

- Developed an AI-powered food label analyzer to extract ingredient, nutrition, and allergen information from product images.
- Integrated **Google Gemini API** for OCR-based image processing and automated label data extraction.
- Improved data extraction and **processing efficiency by 60%** through AI-based analysis.
- Built a rule-based **Health Score system** with WHO aligned checks for health profiles.
- Developed a Streamlit interface and Pandas-based data pipeline, improving **workflow efficiency by 50%**.

[LaTeX Resume Generator AI-Assisted Resume Automation Platform](#)

(Python, Flask, Jinja2, LaTeX, JavaScript, Puter.js)

- Developed an automated resume generation platform using Python, Flask, Jinja2, and LaTeX.
- Built a dynamic **multi section** resume workflow with live preview and one-click PDF generation.
- Automated PDF document generation using **Jinja2 templates and LaTeX compilation**.
- Integrated **Puter.js AI** for content enhancement and automated skill categorization.
- Reduced resume creation **time by 80%** and **improved workflow efficiency by 60%**.

[SecureVault Encrypted Document Management System](#)

(Python, Flask, SQLite, rclone)

- Developed a secure document management system using Python, Flask, SQLite, and AES-256-GCM encryption.
- Implemented OTP authentication, **time-limited file sharing**, and role-based access controls.
- Added watermarking, audit logging, consent tracking, and instant share-link revocation.
- Integrated **SQLite for metadata management** and rclone for cloud storage synchronization.
- Implemented KYC verification and secure document-sharing workflows for controlled file access.

[Weather Monitoring System Using IoT](#)

(ESP8266, DHT11, ThingSpeak API)

- Developed an IoT-based weather monitoring system using ESP8266 and environmental sensors.
- Collected real-time temperature, humidity, and rainfall data using **DHT11 and rain sensors**.
- Implemented **Wi-Fi-based cloud data** transmission for continuous environmental monitoring.
- Integrated **ThingSpeak API** for real-time visualization and historical sensor data analysis.
- Improved **sensor measurement accuracy by 25%** through calibration and iterative testing..
